Dual Credit and Concurrent Credit for High School/Home School Students

What is Dual Credit?
High School students can take Collin College courses and receive credit both for their high school diploma and their college degree. Courses may be taught on the high school or college campus by Collin College professors.

What is Concurrent Credit?
This is when a student earns college credit only for a college course taught on the college campus.

High School/Home School Official approval is required for both dual and concurrent credit.

College credit will transfer to most colleges or universities. Please visit Collin's [TransferU](#) for more information.

Who can participate?
Students enrolled in a public high school, private, charter or home school who have at least junior year high school standing can participate. Students must also have permission from the appropriate high school officials, an A/B grade point average, meet Texas Success Initiative standards and demonstrate the maturity level needed to be successful in college course work.

Enrollment Procedures and Requirements
Students complete the entire admissions, testing, and registration process at Collin College. A photo ID is required for all transactions on campus. Start the process by visiting with your high school counselor to discuss eligibility and class schedule. After meeting with your counselor you can:
